

## **TARIFFS, TRADE WARS, INTEREST RATES, EQUITY MARKETS, RECESSION = UNCERTAINTY**

The news headlines remind us that we are in a period of uncertainty. Uncertainty can lead to higher prices on many household products or services that are necessary. The cost to heat your home and or hot water is 1 of the larger expenses. Spring Brook has a solution to assure stable fuel oil prices.

## **Spring Brook's Guaranteed Value Plan (GVP).**

*Unpredictability can cause gasoline and oil prices to rise. Now is the time to **LOCK IN** your Spring Brook Guaranteed Value Plan (GVP) – oil price ceiling program so you can **SAVE** on your home's heating costs and **AVOID** large winter bills.*

**Spring Brook's Guaranteed Value Plan** (ceiling oil price) for the 2025-2026 heating season is available now! This program provides **you peace of mind from rising prices** and assures Spring Brook's service. **Take advantage of Spring Brook's GVP by LOCKING IN NOW and guaranteeing a ceiling price for next winter. The ceiling price is lower than this past season. The GVP fee is the same. Remember, GVP always guarantees you a lower price per gallon, when prices drop below the ceiling price.** The State of Connecticut statute requires us to have consumers sign a written agreement in order to participate. It's easy to enroll. Simply sign the Guaranteed Value Plan (GVP) contract today, and you and your home will assure oil prices and avoid market swings next winter. New equal monthly budget payments will begin on July 1, 2025 (if applicable).

Thank you for your trust and confidence in Spring Brook. We look forward to keeping you and your family comfortable again next winter. Have a safe summer!

Warmly,

A handwritten signature in black ink that reads "Gregory D. Stafstrom".
