

THE TANKSURE[®] PROGRAM

FIND OUT HOW WE CAN REPLACE YOUR TANK BEFORE IT LEAKS

HERE'S HOW IT WORKS:

1
Your tank is inspected at the time of your annual tune-up. Multiple test scores are taken and the lowest ultrasonic reading is recorded.

2
Information about your tank's ultrasonic reading is entered into our state-of-the-art database. Spring Brook Ice & Fuel monitors readings annually.

3
Receive up to \$2,500 to replace your tank when needed.*

BENEFITS INCLUDE:

Qualifying tanks receive a \$2,500 tank replacement payment to help cover the cost of a replacement.* Customers with oil tanks that do not qualify and are in need of immediate replacement will receive a full refund.

Using EPA-approved testing technology, ultrasonic equipment detects the level of corrosion inside oil tanks.

This service helps protect your home. Proactive replacement can help avoid costly remediation expenses. Included is an inspection of common tank components such as legs, seams, fill and vent pipes, oil lines, and vent whistle.

OWN YOUR HOME?

\$79.95 PER YEAR

*While we cannot guarantee the prevention of a leak or other failure of your tank, we are providing this service with the hope that by testing and monitoring, we can offer a long-term proactive replacement program for our customers. Environmental liabilities and clean-up costs and all other costs arising from or related to discharges of oil or releases of contaminants from the tank or piping are not covered. Program renews annually on the anniversary of enrollment; program renews at prevailing rates.
